

October 18, 2021

To Whom it May Concern,

In April of 2021 Safe Signal acquired the System Sensor Fire Sprinkler Monitoring product line from Honeywell. Safe Signal flow, tamper and pressure devices are still manufactured in Mexico but at our purpose-built manufacturing location in Sonora and branded as Safe Signal.

The Safe Signal product line carries with it all the same ratings and regulatory approvals as the System Sensor Honeywell product. All manuals and datasheets can be found at www.safesignalsprinkler.com. If you have any questions, feel free to contact Technical Support at 844-597-8655 or you may reach out to me at 314-595-6739.

Best regards,

Andy L. Kaempfer
Business Line Leader, Safe Signal
